OBJECTIVE

A Full-Stack Web Developer with experience in JavaScript MERN stack and building responsive Web and Mobile Application. My background as a Scientist in Chemistry has provided me the ability to performing quality/assurance, working in a team environment, and putting our customers at the forefront of everything. Very interested in learning about Project Management, new technologies and new languages. keeping up team spirit to achieve organisational goals and keep a lasting legacy.

EXPERIENCE

Lagos Nigeria
Jun 2020 - Present
Junior Developer (Intern)
LocaaTech

- To help real estate customers buy, rent or solve daily problems with their property.
- Collaborate with senior developers on resolving daily programming task.
- Appraise the identified problems on clients website and provide solutions using clients feedback.
- Participate and assist in the testing ,maintenance and upgrade of frontend and back-end applications

Projects
- A **(MeetApp).** serverless PWA that can display and filter meetup events from the Google calender API. It is developed using Test-Drive-Development techniques to ensure a high test coverage rate. *https://ambabasly.github.io/meet2/*
- A **(Chat App)** for mobile devices using React Native. The app provide users with a chat interface and options to share images and their location. **https://www.youtube.com/watch?v=cI2rUnXU8R0**

Berlin
Apr 2021 - Oct 2021
Junior Developer (Bootcamp)
Career Foundry

- Completed a 941 hour full stack development training program under the supervision of industry leading mentors and tutors.
- The project-based program is divided into 2 parts, Introduction to Front-End Development and Full-Stack Immersion.
- Studied and trained through a total of 7 achievements from 60 exercises and 7 projects.

Projects
- Built the server-side component of a (movies web application). The web application provide users with access to information about different movies, directors, and genres. Users can sign up, update their personal information, and create a list of their favorite movies. *http://my-flixdbapp.herokuapp.com/documentation.html*
- Using Angular to build the client-side for an application called (myFlix), based on its existing server-side code (REST API and database), with supporting documentation. *https://ambabasly.github.io/myFlix-Angular-client/welcome*

Dresden
Jun 2020 - Dec 2020
Working Student
Volkswagen Sachsen GmbH

- Controlled quality of assembled automatives parts.

Lagos
Dec 2014 - Jul 2017
Assistance Quality Control
AKMA Engineering Nigeria Limited

- Conducted analysis, synthesize, purify, modify and characterize chemical and biochemical content before and during productions.

- Shaped metal sheets making up the frame of the vehicle in a specific time.
- Collaborated in a team of German production workers to secure that the production line is complete.

- Developed and conducted programs of analysis to ensure quality control of raw materials, chemical intermediates or final products.
